Journal of Neuroscience Methods, 38 (1991) 275–276
Elsevier Science Publishers B.V.

Contents of Volume 38

Number 1 – June 1991

Research papers

An ASSEMBLER routine for on-line graphic display and averaging of data acquired on a personal microcomputer
G. Alarcon, C.N. Guy and S.R. Walker (U.K.) 1

The electrolytic lesion as a model of spinal cord damage and repair in the adult rat
D.A. Mathers and R.J. Falconer (Canada) 15

Fast cyclic voltammetry can be used to measure stimulated endogenous 5-hydroxytryptamine release in untreated rat brain slices
J.J. O'Connor and Z.L. Kruk (U.K.) 25

Methods for recording the jaw-opening reflex to tooth-pulp stimulation in awake cats
F.M. Boissonade, D. Banks and B. Matthews (U.K.) 35

A technique for recording from brain-stem neurones in awake, unrestrained cats
F.M. Boissonade, D. Banks and B. Matthews (U.K.) 41

A method for the generation of complex vibrotactile stimuli
J.W. Morley, E.N. Crawford, D.G. Ferrington, J.S. Archer, A.B. Turman and M.J. Rowe (Australia) 47

An improved method for the preparation of rat cerebellar glomeruli
F. Vlennot, J.-C. Artault, G. Tholey, J. De Barry and G. Gombos (France) 51

Cultivation of rat fetal spinal cord slices in a semi-solid medium: a new approach to studying axonal outgrowth and regeneration
V. Mandys, R. Van der Neut, P.R. Bär and W.H. Gispen (Czechoslovakia, The Netherlands) 63

Potential errors due to aliasing in digital video analysis of quantitative autoradiography
G.D. Lapin and D.R. Groothuis (U.S.A.) 71

Applications of piezoelectric fluid jetting devices to neuroscience research
G.L. Bernardini, B.A. Rampy, G.A. Howell, D.J. Hayes and C.J. Frederickson (U.S.A.) 81

Short communication

Manufacture of sharpened microelectrodes from varnished wire
R. Jacob and J. Krüger (Germany) 89

Number 2,3 – July 1991

Research papers

An apparatus for recording synaptic potentials from neuronal cultures using voltage-sensitive fluorescent dyes
C.-B. Chien and J. Pine (U.S.A.) 93

A quick and accurate line-sampling technique to quantify myelinated axons in peripheral nerve cross-sections
K. Harman, J. Katnick and J.C. De la Torre (Canada) 107

Improved imaging of rat hindfoot prints for walking track analysis
R.B. Johnston, L. Zachary, A.L. Dellon, W.A. Seiler, IV and D.M. Teplica (U.S.A.) 111

Dual immunocytochemistry using ^{125}I-labeled protein A: a new electron microscopic technique applied to the investigation of chemical connectivity and axonal transmitter co-localization in the brain
P. Kachidian and O. Bosler (France) 115

Comparison of three intracellular markers for combined electrophysiological, morphological and immunohistochemical analyses
J.G. Tasker, N.W. Hoffman and F.E. Dudek (U.S.A.) 129

Vibrodissociation of sliced mammalian nervous tissue
V.S. Vorobjev (U.S.S.R.) 145

Isolation and characterisation of proliferating cells from the telencephalic vesicles of gestational-day 13 rats
H. Koppel, K.W. McDermott and P.L. Lantos (U.K.) 151

An improved invertebrate synaptosomal preparation with cholinergic properties
C. Torrence-Campbell, H. Gates, U. Efflong, S. Sweet and J.G. Townsel (U.S.A.) 161

Application of circular statistics to the study of neuronal discharge during locomotion
T. Drew and S. Doucet (Canada) 171

A procedure for the simultaneous visualization of two anterograde and different retrograde fluorescent tracers. Application to the study of the afferent-efferent organization of thalamic anterior intralaminar nuclei
D. Minciacchi, A. Granato, A. Antonini, A. Sbriccoli and G. Macchi (Italy) 183

Simulation of self-motion in tethered flying insects: an optical flow field for locusts
A. Baader (Switzerland) 193

Room temperature culture extends the useful life of adult neurons for voltage-clamp experiments
J.C. Magee and G.G. Schofield (U.S.A.) 201

Methods for repeated recording in visual cortex of anesthetized and awake behaving infant monkeys
H.R. Rodman (U.S.A.) 209

Stereotaxic lesions of the hippocampus in monkeys: determination of surgical coordinates and analysis of lesions using magnetic resonance imaging
P. Alvarez-Royo, R.P. Clower, S. Zola-Morgan and L.R. Squire (U.S.A.) 223

Calibration of ion-selective microelectrodes for use with high levels of interfering ions
A.N. Salt and A. Vora (U.S.A.) 233

A fast staining method for CNS slices
L. Riboni, F. Luna and H. Núñez-Durán (Mexico) 239

A simple non-iterative procedure for fitting of multiexponential functions
S.L. Mironov (Germany) 243

An analysis of the oscillatory patterns in the central nervous system with the wavelet method
A.W. Przybyszewski (Germany) 247

A new cuff electrode for reversible conduction blocking
M. Brunner and U.T. Koch (F.R.G.) 259

Short communication

A concentration-clamp system allowing two-electrode voltage-clamp investigations in oocytes of *Xenopus laevis*
M. Madeja, U. Mußhoff and E.-J. Speckmann (Germany) 267

Author index (vol. 38) 271

Subject index (vol. 38) 273
